

# WHAT CLIENTS ARE SAYING ABOUT Apptricity®

"We bumped the launch date back one or two times in an effort to make sure we got all the things in that we wanted. They were very patient with us, with making changes. Apptricity was into, 'Tell me what you want to do and we'll make it happen. If you want it to do that, then it will.'"

Maria Warren  
Accounts Payable Supervisor  
TD Bank Group

"Apptricity has a very good team and a very good product. The people are easy to work with, and we have a great working relationship. We really stressed them, but they didn't crack. I thought a couple of times that they were going to crack, but they insisted they would get it done, and they have. So I'm really excited to see what happens with the inventory module, and continue to grow with Apptricity. When you calculate the office and the true ROI, it probably could be around \$10,000 a month."

Ronnie Hobbs  
President and CEO  
Lone Star Instrumentation & Electric

"We selected **Apptricity** Expense for many reasons, but helping to bring our expense management process up-to-date and move away from paper-based process supplements our stewardship of the resources we consume. *Expense* makes the process painless through automation as well as provide additional visibility, auditability and control."

CFO  
Major Retail Chain

"It's essential that we maintain positive supplier relationships and the Apptricity solutions have enabled us to not only communicate better with our suppliers, but leverage cost savings from process improvements in our interactions. Internally, the savings we're gaining from automating invoice and expense transactions handling are immeasurable."

Project Manager  
Energy Provider

"Support team members go out of their way to deliver exceptional support...The continued patience, support and dedication that the team exhibits are greatly appreciated and highly valued."

Project Manager  
Texas Energy Provider

"We selected **Apptricity** Warehouse as the best-of-breed solution to automate our warehouse."

CEO  
Technology Integration Partner
