Apptricity Corporation

A leading global provider of mobile enterprise solutions for supply chain management and spend management for both the commercial and government sectors

Apptricity is a leading global provider of innovative mobile enterprise software for mission-critical supply chain management (SCM) and spend management solutions. At Apptricity, we think outside the box. We combine a state-of-the-art user experience, forward-thinking designs and innovative technologies, all expeditiously delivered across multiple platforms to address critical business needs.

Our goal is to be a partner in your success, empowering you to leverage advanced business intelligence, achieve global visibility and reap the benefits of enterprise mobility. A determined, mission-focused team, we possess uncompromising integrity and knowledge. We routinely operate with a benchmark of excellence that meets or exceeds industry standards and stakeholder expectations.
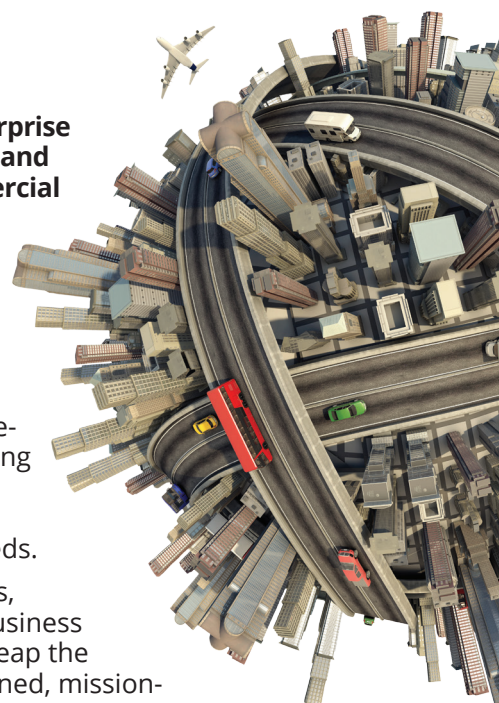

We provide unparalleled value by delivering the highest quality mobile enterprise solutions, allowing you to achieve long-term time and cost savings. A self-reliant organization with a clear focus and a collaborative approach, we believe our capabilities and professionalism inspire others to excel. Our vision is to become the leading provider of innovative mobile enterprise software worldwide.

Proven Success

Our impressive track record of successful deployments for commercial and government clients includes GameStop®, Micro Electronics, Goldman Sachs®, Cameron International, the U.S. Army, the Judicial Branch of the U.S. Government and many more.

Professional Services Team

Our highly experienced professional services team brings broad skill sets and deep subject matter knowledge to every engagement. Using our proven methodology and industry-standard procedures, we combine service excellence with the ability to design and execute creative solutions that solve challenging business problems. Our extensive experience in the enterprise-wide integration of multiple systems includes integrating legacy software and existing infrastructure with new applications and open systems.

Strategic Mobile Solutions

Our feature-rich solutions are expertly architected from the ground up to exceed your expectations. To accommodate customers' deployment needs, we provide our solutions as perpetual licenses or Software as a Service (SaaS) subscriptions.

Supply Chain Management

Five Tenets of Apptricity Solution Development

Adaptable Applications

Apptricity applications are platform-agnostic and highly adaptable. They run on any standard operating system, Relational Database Management System (RDBMS), Web server, application server or mobile technology platform. Apptricity supports an N-tier configuration.

Unrestricted Configuration

Our business rules engine, workflow and integrated administration tools enable your administrators to dynamically configure Apptricity solutions without information technology (IT) team assistance. Our applications readily adapt to your organization's business logic, rules, best practices and compliance requirements.

Scalable Systems

Our solutions deliver the same advantages regardless of your company's size. They also scale and grow with you. Whether you achieve your infrastructure goals incrementally or in a single-implementation, enterprise-wide fashion, our SOA platform empowers you to easily move to different technologies and leverage them as needed.

Superior Integration

The Apptricity integration engine allows us to work directly with any third-party data source, dynamically or via batch. We also provide pre-built integration connectors for Oracle®, SAP®, PeopleSoft, Infor Lawson, Epicor®, JD Edwards, GEAC and Great Plains technologies, as well as many others.

Minimal-Cost Migration

You configure the solution once so it meets your needs. Our solutions' migration capabilities retain your configurations while eliminating excessive costs associated with upgrades. With Apptricity, you configure once and migrate forever.

Methodology

All Apptricity applications are built on an advanced service-oriented architecture (SOA) framework. Our platform leverages reusable service objects as building blocks for modernized systems, maximizing legacy and other technology investments. Our SOA platform and enterprise solutions deliver significant benefits:

Low cost of ownership: Apptricity's SOA platform guarantees low-cost, non-resource-intensive implementation, configuration, deployment and maintenance. Because upgrades occur automatically, you realize dramatic savings by eliminating the need for expensive, drawn-out consulting services each time.

Rapid upgrades: Apptricity implements new features quickly. Migrating to a new version can occur in as little as one month. We respond rapidly to changing business requirements and technologies without the risk of incompatibility.

Convenient access: Our applications use thin-client architecture, giving users seamless access to our solutions from anywhere in the world with just a standard Web browser. Our expertly designed mobile applications support iOS®, Android® and Microsoft® Mobile tablets or other devices.

Long-term advantages: Apptricity's mobile solutions can be delivered at unprecedented speeds, readily migrating when needed and adapting easily to new business requirements — all at a low cost. As your business grows and changes, our systems change with it.

About Apptricity

Apptricity Corporation provides mission-critical supply chain management and spend management solutions to small, midsize and global enterprises and government organizations worldwide. Apptricity software and solutions mobilize any enterprise with unprecedented levels of real-time information and business intelligence so management has visibility into every action and transaction within the enterprise and among its partners, customers and suppliers. Powered by Apptricity JetStream platform, our solutions enhance legacy enterprise applications and extend the value of information technology investments. Our platform enables us to address the universal objectives of business, government and the military with accelerated business processes and command visibility.
